

# Cornell Cooperative Extension of Ulster County AGRICULTURE PROGRAM

## 2019 Commercial Agriculture Program Enrollment

*The Commercial Agriculture Program at Cornell Cooperative Extension (CCE) of Ulster County has supported Ulster County farmers to advance agriculture-based economies since 1913. Every year we need your help to assure that we can continue this esteemed tradition into the future!*

We support agriculture by empowering stakeholders to make well-informed decisions that work for their specific needs. We provide research-based, unbiased, third-party information to farmers and the greater agriculture industry through farm visits, phone, and email communications, as well as educational programs and trainings. See enclosed list of our educators and their areas of expertise.

Serving as an education and networking hub, we connect farmers to innovative technology in all areas of crop and livestock production. These include sustainable practices for improving farm resiliency and timely information on integrated pest management (IPM). Your enrollment helps support this important work.

**Please consider supporting the CCE Ulster County Agriculture Program this year with a \$50 enrollment.**

### Enrollment benefits:

- **Discounted registration fees** for many educational events - your enrollment can pay for itself in savings!
- **A listing for your farm or agribusiness on our Farm Guide webpage** (page 2, part 6).
- **Subscription to Ag Focus**, the monthly print agriculture newsletter of CCE Ulster and Orange Counties.

We also connect our growers with **commodity-specific publications** and **timely IPM and grower alert messages**. Updating your contact information and preferences ensures that you and your farm business or household receives **targeted educational information** relevant to your interests and needs (page 2, parts 4 and 5).

A significant portion of CCE Ulster's annual county funding goes to help support the **Eastern New York Commercial Horticulture Program** (ENYCHP) which has its own/separate enrollment and mailing list. This program provides commercial Ulster County fruit and vegetable growers access to a greater range of Cornell production specialists. Your enrollment in the CCE Ulster Ag Program helps us offset this cost, and further helps support programs for a much wider variety of Ulster County's agriculture needs, beyond ENYCHP areas.

Supporting our Agriculture Program through annual enrollment also helps CCE Ulster County demonstrate to Cornell, state and local government, and other funders, the commitment and **direct support from the community to keep a strong, local Cornell Cooperative Extension** Program in Ulster County.

*Thank you for your support in 2019!*
